

# Post-Event Report 2026

# Focus on 2026 edition

The **ICGT026** program included five sessions with keynote lectures covering the latest developments and the most innovative projects in the field. In addition, participants had the opportunity to schedule business meetings throughout the day via an online partnering platform. The congress also featured interactive roundtable discussions, encouraging open dialogue and exchange among experts and attendees.

The topics covered during this congress were:

- Next-Generation RNA Therapies: From mRNA to Circular RNA
- Exploring the Future of CARs (ex vivo & in vivo)
- Gene Editing: Shaping the Future Today
- EVs and the Secretome: From Biology to Therapy
- Quality and Technical Challenges in Advanced Therapies
